

CLEANING

BOEN CLEANER

For cleaning of Protect-Ultra lacquered and matt lacquered wooden flooring

BOEN Cleaner is a cleaning agent developed for use on parquet, wood and other lacquered surfaces.

Lacquered floors should not be washed with soap. Soap contains fat, and would leave a greasy film on the surface, which over time can make the floor look dirty.

INSTRUCTIONS FOR USE

For daily cleaning use dry cleaning methods, such as a dry mop or vacuum cleaner. Microfibre cloth is also suitable. When washing is needed, you should be aware of the following:

Wood and other lacquered flooring can be affected by water, so a well wrung cloth/mop is recommended. Any spillage on the floor should be removed immediately, and before it dries.

The surface can withstand the most common household chemicals. Difficult stains can be removed with a stronger mixture

of water/detergent, or gently with white spirit. If white spirit is used, dry afterwards with a damp cloth.

USAGE

Normal daily cleaning: 25ml to 5 l water. Badly marked floor: 50ml to 5 l water.

TECHNICAL SPECIFICATIONS

Ph values:

Concentrated, approx. 10

Dosage in water (0.5 %) approx. 8

Contents anionic and non-ionic tensides, chelating agents (complex builders), and glycoethers.

Shelf life - At least 2 years from date of production, in original unopened can.
